

CSIRO LAB AND TESTING FACILITIES

Name: CSIRO Perth
Client: CSIRO (Multiplex Constructions)
Specifying Authority: GHD (Mechanical / Consulting Engineer)
Site Location: Perth, Western Australia
Value at Completion: \$5.1 million
Year Completed: 2001

Project Description: The CSIRO facility located in Perth is a multi-building complex consisting of laboratories, test facilities and offices, each with their own specific requirements.

Haden's experience in scientific and health facility installations and our collaborative approach to project management saw the implementation of a solution which protects occupants and the environment.

An agreed contract price gave the client added security.

Haden's team of specialised engineers and technicians worked closely with the client to ensure all sterile and acoustic requirements specific to these types of facilities were met.

The project scope included:

- central chilled and heating water plants
- compressed air plant
- pipework reticulation
- laboratory gases
- VAV air conditioning systems
- fume cupboards and ventilation systems.
